

Gemini

Give your patients the mobile-first experience they deserve

Today's patient consumers expect one-tap access to everything a health system offers digitally—including your EHR and so much more—on the device of their choice. Providing a Digital Front Door that offers a seamless and satisfying patient experience will improve engagement and drive patient loyalty.

Meet Gemini from DeliverHealth. It's the first, comprehensive patient experience platform that puts your entire health system at your patients' fingertips. Gemini integrates your EHR and all your existing, disparate point solutions into a single, attractive Digital Front Door.

Our award-winning platform is white-labeled, so you can leverage the power of your brand. And because our app is optimized for iOS, Android and Web, your patients will get instant digital access to your providers, locations and services anytime, anywhere.

Create A Holistic End-User Experience

With embedded EHR functionality along with 30+ integrations (and counting), Gemini's single point of integration offers users a convenient, easy-to-navigate experience and helps health systems connect every digital interaction and transaction across all six areas of the patient journey.

Make Patient Experience Your Competitive Differentiator

Start driving engagement, boosting patient loyalty and driving your health system forward with Gemini today.

Get Next-Generation Functionality

By connecting the disconnected, Gemini helps your health system achieve:

- **Growth** – We start by integrating the existing digital apps your patients use right now. Then, because we've built Gemini to scale as you do, you can add new integrations and functionality with ease.
- **Reliability** – Annual app updates and quarterly EHR updates mean you're fully supported with the newest features and benefits.
- **Loyalty** – Customize your interface with extensive branding options to fit your unique brand experience and drive patient loyalty.
- **Transactional value** – Eliminate digital disruptions to drive increased transactional value at every customer touch point.

63%

of patients will switch providers for a better digital experience.
