

DeliverHealth's Medical Scribing

Providing multiple documentation options on eSOne so our clinicians can focus on what is more important – the patient!

“DeliverHealth has greatly cut down my charting time allowing my work/life balance to be much improved – thanks!”

– Jeannie Lessly, M.D., CEO of Doctor Jeannie Senior Care, a Division of Creative Healthcare, PLLC

Asynchronous Medical Scribing

Accessing a trained medical scribe on the eSOne platform is as easy as tapping a button on an iPhone or Android device. This allows you to record the patient-clinician encounter, which our medical scribes will listen to. They will then create a structured note in the EHR for physicians to review and sign off on.

Synchronous Medical Scribing

On our eSOne platform, you can connect with our highly trained medical scribe in real time. The scribe listens to the encounter and creates a structured EHR note for physicians to review and sign off on.

	Asynchronous	Synchronous
Highly Trained Medical Scribe	✓	✓
Multiple Workflows on One Platform	✓	✓
Medical Documentation	✓	✓
Orders (Labs, Rx, and Radiology)	✓*	✓
Procedure Notes	✓*	✓
PQRS, MURs, etc.	✓*	✓
Discharge Summaries/Instruction		✓
